Experience

Assurentis Technologies, Intern, Test Automation — Aug 2026 to present, remote

B2B SaaS for Oracle Fusion Cloud ERP (Accounts Payable, General Ledger, HCM).

- Rebuilt the client facing business test report so clients can read results on their own: plain language errors, accurate timings, correct pass/fail per step and the right screenshots.
- Caught a false pass bug where invoices stuck in "Not validated" were reported as passed.
- Audited ~130 generated test specs and flagged coverage gaps that shaped what the team fixed next.
- Automated end to end Accounts Payable flows across 9 invoice scenarios.
- Restored the team's CI pipeline the same day an OS upgrade broke every run, and made the test engine work across 3 Oracle environments.

TypeScript, Playwright, GitHub Actions, Firestore, Oracle REST APIs

Products

JobPipe, building in public — repo

Free, open source Telegram job alert bot in development. Checks 60+ company career pages plus LinkedIn, Indeed and Naukri, and will send matched alerts twice a day at zero infra cost. Chose Telegram over WhatsApp (cost and ban risk) and a bot launch before any app. Signups, 2 week retention and thumbs-down rate tracking plus an embedding vs keyword matching A/B test are set up for launch. Built a ghost job detector.

NazarIQ — live repo

Job search toolkit: ghost job scorer, referral generator and proof of work brief. Next.js, TypeScript, Supabase, Gemini.

KharchaAI / StatementIQ — live repo

RAG + LLM bank statement analytics, plus an underwriting demo.

FasalDrishti — live repo

AI fruit quality grading (CNN + DCFNet + Grad-CAM) with shelf life estimation. Rank 4 at AI for Bharat Hackathon 2026 (IIIT Delhi). First-author IEEE paper accepted at AMLDS 2026, Osaka.

Retail Sales Analytics — repo

SQL pipeline on ~10K order rows feeding a Tableau dashboard.

Leadership

- Committee Head, External Affairs, AARUUSH (SRM's national tech fest, 10,000+ attendees)
- Corporate Relations Member, SRM Placement Team

Education

B.Tech Computer Science, SRM Institute of Science and Technology — 2026, CGPA 8.59

Skills

Product: product metrics, funnels, cohorts, A/B test design, PRDs, user stories, UAT
Data: SQL, Python, Tableau, Excel
Build: TypeScript, Next.js, Supabase, REST APIs, LLM APIs, RAG
